

CLT ENVIROLAW SUSTAINABILITY POLICY:

CLT Envirolaw is passionate about the principles that sustainability is founded on: social inclusion, environmental impact and economic prosperity. Our approach is to find solutions to fit a company's culture and add value to a client's business.

CLT Envirolaw endeavours to demonstrate commitment to its values in the following ways:

- managing environmental impacts by using recycled paper, only printing when necessary and using print friendly functions to reduce the number of pages used
- consuming fair-trade coffee and tea and sustainability sourced food
- being aware of how much water is used
- travelling by public transport or walking where possible
- using energy saving lighting
- treating anyone associated with the company fairly and equally
- developing the talents of young people through opportunities in the workplace
- actively committing time and skills to voluntary work to help improve the education of individuals and companies about respect for the environment, and respect for men, woman and children
- aiming to be profitable
